Acuity Brands Lighting, Inc.

Made in the USA

Form No. 8392.2 | Printed with soy inks

# MAXIMIZE savings, MINIMIZE waste

**GreenBay™** is an energy efficient high-intensity fluorescent high bay that matches energy savings with environmental savings by significantly reducing packaging, waste, weight, floor space needed and installation time. The new package design:

- Saves unpacking time, disposal time and cost, and installation labor
- Increases productivity
- Decreases storage requirements
- Reduces fuel costs for transport
- Ships with power cords, hangers and, as an option, comes prelampped

## Shipping Comparison

### Greenbay Shipment

1 pallet  
471 LB total  
78 ft<sup>3</sup>  
6 LB Cardboard

### Traditional Shipment

3 pallets  
762 LB total  
147 ft<sup>3</sup>  
128 LB Cardboard

**57%**  
Pallet Reduction

**93%**  
Cardboard Reduction

**50+%**  
Energy Savings

## The Four Rs

To further support the objective to **reduce, reuse** and **recycle** materials, MetalOptics™ also has a **return** program for the GreenBay shipping package. The frame is designed to be repacked into the cardboard top that is part of the original shipping package which forms a return shipping container. After disassembling the frame to access the fixtures, the parts are simply packed up in the cardboard top, shrink wrap and poly bags are used as packing material and the entire package is shipped back to MetalOptics in the prepaid shipping labeled package. Customers will be credited for returning the shipping package. **This increases your net waste savings to 100%** (with the exception of the reusable pallet).

## Environmentally Sensitive Design

The GreenBay is a breakthrough in environmental sensitivity. By utilizing a unique steel (patent pending) frame, thirty-two fixtures can be shipped per pallet thereby reducing cardboard by 93%. As a market leader in energy saving technology, we believe extending our prowess to a cleaner environment is our responsibility.

## GreenBay Fluorescent High Bay

The GreenBay Fluorescent High Bay, with its unique interlocking tab designs, ensures a robust structure that allows additional features to be added in the future. It also solidifies a new level of sustainability for various applications such as retail, warehouse, industrial, commercial and manufacturing areas.

- Energy savings
- Optical superiority
- Optimal thermal management
- T8 & T5HO lamps
- Solid state electronic ballasts
- Preserves natural resources and eliminates waste
